Saving Energy

1 Unit = 1000 kWh (kilo Watt hour)

Do's:

- Use minimum amount of electricity between 6PM to 11PM (this is KE's peak time) that means they will charge 7 Rupees more per unit in peak time
- Keep your monthly units under 300, because once you cross the the 300 mark your per unit amount will go up to 7 rupees[1]
- Pay within due date to avoid penalty charges
- Use DC Inverter AC's and Fridge

Don'ts:

- Do not leave switches turned on
- Do not leave lights and fans turned on thinking they won't charge up much.

Difference of energy in appliances

Device	Energy(watts)
Energy Saver Light	24
LED Bulb	10
1 Ton AC (Non Inverter)	1500
1 Ton AC (Inverter)	900
Fridge (Non Inverter)	180
Fridge (Inverter)	90
Computer (with all accessories)	200
Laptop	40

1. If your bill is of 305 Units then you'll be charged 10.20 for the 300 Units and 17.60 for the 5 units.

UNITS	CHARGES
201-300	**10.20**
301-700	**17.60**
